

# COMPOSITE TRANSFORMER 150W

*The 150W Composite Transformer* is an extremely flexible and inexpensive option for powering CS landscape lighting systems. It includes a built-in photocell with countdown timer for easy control, but is easily bypassed if desired. It is a great option for small lighting systems or small zones of larger systems. It includes a single 150W Coastal Connector output. This transformer is tested to meet or exceed UL1838 and IP67 Standards.

CS 150W Composite Transformers, like all of our AC transformers, are suitable for lighting only and may not be used with audio products.

BLACK

## 150W COMPOSITE TRANSFORMER SPECIFICATIONS

Size (H x W x D): 6.5in x 4.25in x 3.75in

Weight: 6.65 lbs

Construction: ABS Plastic
